

## **Mineral Resource Geologist**

Mercator Geological is expanding its Mineral Resource team and is looking for a skilled Mineral Resource Geologist to join our dynamic and fast-growing company. Mercator is a locally driven, globally-focused geological consultancy on Canada's East Coast with over 27 years of consulting expertise. It's an equal opportunity employer offering competitive compensation and company benefits, including group health and dental plan, profit sharing, remote work arrangements, and parental leave benefits.

As a member of our resource geology team, you will have solid understanding of a range of mineral deposits and geological concepts and be proficient in the use of geological modeling software, databases, QAQC programs and development of 3D geological models. The Resource Geologist will support the development and optimization of geological models and related mineral resource block models and support client-based mining and geology teams with a view to optimizing assessment and definition of mineral resources.

### **Your Role**

- Responsible for providing a range of geological services to clients in the mining and exploration sectors including resource evaluations, National Instrument 43-101 technical reporting, geological mapping, and geological modeling.
- Collect and analyze geological and geotechnical information.
- Ability to act as a Qualified Person as defined under National Instrument NI 43-101 (NI 43-101) and undertake site visits as required under that instrument
- Develop cost estimates for geotechnical and geological assessments.
- Communicate project requirements with clients and sub-consultants.
- Schedule and manage projects to be on budget and on time.
- Occasionally undertake and supervise geological field investigations.
- Work with senior management to assist with business development and marketing initiatives.
- Work directly with clients to establish and maintain good working relationships.

### **Qualifications**

- Degree in Geology, Geoscience or Earth Science, with a focus on economic, structural or ore deposit geology and digital deposit modelling.
- Be registered as a P.Geol. or P.Eng. in a Canadian jurisdiction.
- Have a minimum of 5-8 years recent and relevant expertise, preferably in a consulting environment.
- Demonstrated knowledge of geological modelling software such as Geovia Surpac and Seequent Leapfrog Geo and Edge.
- Demonstrated knowledge of geostatistical concepts and exploratory data analysis.
- Demonstrated knowledge of laboratory analytical methods and related quality control/assurance measures.
- Be a Qualified Person as defined under NI 43-101.

- Be legally entitled to work in Canada, possess a valid passport and be able to travel for project work in Canada and internationally.
- Valid driver's license.
- Strong people and communication skills and an ability to work in a team environment.
- Ability to compile and complete clear and effective reports in a timely manner.
- Specialization in structural geology, geochemistry or geostatistics considered an asset.
- Spanish and/or French as a second language an asset.
